4.a Hydrologic Balance: Diversions

The County has received copious amounts of moisture since the last inspection. The site's soil conditions are still very soft, preventing effective ditch maintenance from occurring. Runoff is pooled in certain areas. All ditches and culverts which were inspected appeared to be capable of functioning as designed.

16.a Roads: Construction, Maintenance, Surfacing

All of the roads being utilized by heavy trucks are in a graded, well compacted condition.

18. Support Facilities, Utility Installations

To date, the permittee has not initiated the construction of the maintenance shop which has been permitted through the Division (Task ID #2059, final OGM approval 12/23/2004). It is the Division's understanding that the financing of the project is still being evaluated.

19. AVS Check

According to Mr. Guy, the only outstanding permit amendment is the Chapter 1, Ownership and Control amendment submitted August 30, 2004. The status of this review is being investigated.
